ULTRASOUND STUDY OF WHOLE ABDOMEN

- **Liver is mildly enlarged in size, and shows increased echotexture of liver parenchyma.** No intrahepatic biliary radicle dilatation is seen. No space occupying lesion is seen. Hepatic veins and IVC are seen normally.
- **Gall bladder** is normal in size and **shows few calculi in lumen measuring approx. 6.9mm** . No mass lesion is seen. GB walls are not thickened
- **CBD** is normal at porta. No obstructive lesion is seen.
- **Portal vein** Portal vein is normal at porta.
- **Pancreas** is normal in size and shows homogenous echotexture of parenchyma. PD is not dilated. No parenchymal calcification is seen. No peripancreatic collection is seen.
- **Spleen** is normal in size and shows homogenous echotexture of parenchyma. No SOL is seen.
- No retroperitoneal adenopathy is seen. No ascites is seen.
- **Both kidneys** are normal in size and position. No hydronephrosis is seen. No calculus or mass lesion is seen. Cortico-medullary differentiation is well maintained. Parenchymal thickness is normal. No scarring is seen. Right kidney measures 86 x 36mm in size. Left kidney measures 96 x 41 mm in size.
- **Ureters** Both ureters are not dilated. UVJ are seen normally.
- **Urinary bladder** is normal in contour with anechoic lumen. No calculus or mass lesion is seen. UB walls are not thickened.
- **Uterus is diffusely bulky in size, measures 116 x 76 x 68 mm and shows well defined hypoechoic lesion measuring 37 x 45mm in anterior wall. Endometrium is diffusely thickened. A hypoechoic heterogeneous multicystic space occupying lesion of size~ 65 x 49mm is seen involving endometrial cavity with mild internal and peripheral vascularity ----? nature.**
- **Cervix** is normal.
- **Both ovaries** right ovary is normal in size and echotexture. Left ovary could not be traced out.
- No adnexal mass lesion is seen.
- No free fluid is seen in Cul-de-Sac.

OPINION:

- **Mild hepatomegaly with fatty infiltration of liver grade-I.**
- **cholelithiasis.**
- **diffusely bulky uterus with anterior wall fibroid with diffusely thickened endometrium with hypoechoic heterogeneous multicystic space occupying lesion involving endometrial cavity with mild internal and peripheral vascularity ----? nature. ...Adv: M.R.I pelvis.**

Clinical correlation is necessary.
