

Patient Name	: Ms.REETA VERMA	Visit No	: CHA250034124
Age/Gender	: 20 Y/F	Registration ON	: 25/Feb/2025 02:58PM
Lab No	: 10131420	Sample Collected ON	: 25/Feb/2025 02:58PM
Referred By	: Dr.RBH	Sample Received ON	:
Refer Lab/Hosp	: CHARAK NA	Report Generated ON	: 25/Feb/2025 05:51PM

MRI: BRAIN

IMAGING SEQUENCES (NCMR)

AXIAL: SWI, DWI, T1, FLAIR & TSE T2 Wis. **SAGITTAL:** T2 Wis. **CORONAL:** FLAIR Wis.

Few small hemorrhagic contusions with mild perifocal edema are seen in right fronto-temporal lobes. Mild mass effect is seen in the form of effacement of adjacent cortical sulci, right lateral ventricles and midline shift of approx 2mm towards left.

Rest of the cerebral hemispheres show normal MR morphology, signal intensity and gray - white matter differentiation. The basal nuclei, thalami and corpus callosum are showing normal signal intensity pattern. Rest of the lateral ventricle and third ventricle are normal in size shape and outline.

Brain stem and cerebellar hemispheres are showing normal morphology, signal intensity and outline. Fourth ventricle is normal in size and midline in position.

Major intracranial dural venous sinuses are showing normal outline and flow void.

Sella, supra-sellar and para-sellar structures are normally visualized.

Screening of cervical spine was done which reveals no significant abnormality.

IMPRESSION:

Alleged history of trauma showing :

- **Small hemorrhagic contusions with mild perifocal edema in right fronto-temporal lobes with mass effect as described.**

NOT FOR MEDICO-LEGAL PURPOSE.

Please correlate clinically.

DR. RAVENDRA SINGH
