## **ULTRASOUND STUDY OF WHOLE ABDOMEN**

- **Liver** is mildly enlarged in size, and shows mildly inhomogenous echotexture of liver parenchyma. No intrahepatic biliary radicle dilatation is seen. No space occupying lesion is seen. Hepatic veins and IVC are seen normally.
- **Gall bladder** is normal in size and shows few calculi in lumen, size upto ~ 6.7 mm. No mass lesion is seen. GB walls are not thickened
- **CBD** is normal at porta. No obstructive lesion is seen.
- **Portal vein** Portal vein is normal at porta.
- **Pancreas** is normal in size and shows homogenous echotexture of parenchyma. PD is not dilated. No parenchymal calcification is seen. No peripancreatic collection is seen.
- **Spleen** is normal in size and shows homogenous echotexture of parenchyma. No SOL is seen.
- No retroperitoneal adenopathy is seen.
- No ascites is seen.
- **Right kidney** is small & echogenic (grade-III) with tittle loss of cortico-medullary differentiation. No hydronephrosis is seen. No calculus or mass lesion is seen. Parenchymal thickness is normal. No scarring is seen. Right kidney measures 54 x 21 mm in size.
- **Left kidney** is normal in size and position. Renal parenchyma echogenicity is raised (grade-III) with loss of cortico-medullary differentiation. No hydronephrosis is seen. No calculus or mass lesion is seen. Parenchymal thickness is normal. No scarring is seen. Left kidney measures 80 x 34 mm in size.
- **Ureters** Both ureters are not dilated. UVJ are seen normally.
- **Urinary bladder** is normal in contour with multiple internal echoes in lumen. No calculus or mass lesion is seen. UB walls are not thickened.
- **Uterus** is normal in size, measures 73 x 36 x 44 mm and shows homogenous myometrial echotexture. Endometrial thickness measures 6.3 mm. No endometrial collection is seen. No mass lesion is seen.
- **Cervix** is normal.
- **Both ovaries** are normal in size and echotexture.
- No adnexal mass lesion is seen.
- No free fluid is seen in Cul-de-Sac.

### **OPINION:**

- **Mild hepatomegaly with mild inhomogenous echotexture of liver parenchyma.**
- **Cholelithiasis.**
- **Bilateral renal parenchyma echogenicity (grade-III). Adv: RFT correlation.**
- **Multiple internal echoes in UB lumen -- ? cystitis.**

**Clinical correlation is necessary.**
