## **TRANSVAGINAL ULTRASOUND**

- **Uterus** is normal in size, measures 68 x 41 x 33 mm and shows homogenous myometrial echotexture. Endometrial thickness measures 5.6 mm. No endometrial collection is seen. No mass lesion is seen.
- **Cervix** is normal in size measures 26 x 21mm & echotexture.
- **Both ovaries** are normal in size & echotexture. Right ovary measures 20 x 22 x 30 mm vol. 7.4 cc. Left ovary measures 27 x 21 x 22 mm vol. 6.6 cc.
- No adnexal mass lesion is seen.
- **Fluid is seen in pelvis with few septations.**

### **OPINION:**

- **FLUID IN PELVIS WITH FEW SEPTATIONS.**

Note:-

Features of pelvic inflammatory disease cannot be ruled out on USG. In view of smelling PV discharge and lower abdominal pain with fluid in pouch of douglas....Finding are favour of pelvic inflammatory disease. Needs clinical correlation.
