HIGH RESOLUTION ULTRASOUND STUDY OF BOTH BREASTS
Study performed with 10.0MHz high frequency linear probe.

- **Right breast** The breast architecture on right side shows homogeneous echotexture of parenchyma. Normal nipple areola complex is seen. No well formed space occupying lesion is seen.
- **Left breast** The breast architecture on left side shows homogeneous echotexture of parenchyma. Normal nipple areola complex is seen. No well formed space occupying lesion is seen.
- No abnormal calcification is identified in either breast.
- Subareolar region appears normal. No abnormal ductal dilatation is seen.
- Axillary tail is normal. No obvious axillary lymphadenopathy is seen.

IMPRESSION:

- **BOTH BREASTS – NORMAL (BIRADS – I CATEGORY).**

Clinical correlation is necessary.

**DR. NISMA WAHEED
MD, RADIODIAGNOSIS**
