HIGH RESOLUTION ULTRASOUND STUDY OF BOTH BREASTS
Study performed with 10.0MHz high frequency linear probe.

- **Right breast** Fibroglandular parenchyma appears dense, echogenic and heteroechoic in echotexture in upper quadrant involving at 11-12-1 'o'clock position with multiple tiny cysts measuring approx 2-4mm - s/o fibro-cystic breast disease. Another complex cystic lesion measuring 6 x 5mm is noted at 1 'o' clock position. Rest of the breast architecture on right side shows homogeneous echotexture of parenchyma. Normal nipple areola complex is seen.
- **Left breast** A well defined oval echogenic lesion measuring approx 9 x 7 mm is noted at 3 'o' clock position. Fibroglandular parenchyma appears dense, echogenic and heteroechoic in echotexture in outer quadrant. Rest of the breast architecture on left side shows homogeneous echotexture of parenchyma. Normal nipple areola complex is seen.
- No abnormal calcification is identified in either breast.
- Subareolar region appears normal. No abnormal ductal dilatation is seen.
- Axillary tail is normal. No obvious axillary lymphadenopathy is seen.

IMPRESSION:

- **RIGHT BREAST: FIBROCYSTIC BREAST DISEASE WITH COMPLEX CYST (BIRADS II CATEGORY).**
- **LEFT BREAST: FIBROGLANDULAR PARENCHYMA DENSE, ECHOGENIC AND HETEROECHOIC IN ECHOTEXTURE (BIRADS II CATEGORY) WITH ECHOGENIC SPACE OCCUPYING LESION (BIRADS III CATEGORY).**

Needs FNAC for further evaluation

Clinical correlation is necessary.

ULTRASOUND STUDY OF PELVIS

- **Urinary bladder** is normal in contour with **few floating internal echoes in lumen**. No calculus or mass lesion is seen. UB walls are not thickened.
- **Uterus** is **mildly in size, measures 90 x 41 x 34 mm** and shows homogenous myometrial echotexture. Endometrial thickness measures 10 mm. No endometrial collection is seen. No mass lesion is seen.
- **Cervix** is normal.
- **Both ovaries** are normal in size and echotexture. Right ovary measuring 20 x 17 x 16mm with volume 3.1cc. Left ovary measuring 25 x 17 x 14mm with volume 3.4cc.
- No adnexal mass lesion is seen.
- **Minimal free fluid is seen in pouch Douglas.**

IMPRESSION:

- **FEW FLOATING INTERNAL ECHOES IN UB LUMEN - ? CYSTITIS (ADV: URINE R/M).**
- **MILDLY BULKY UTERUS.**
- **MINIMAL FREE FLUID IN POUCH DOUGLAS.**

Clinical correlation is necessary.
