Age/Gender	: 35 Y/F	Registration ON	: 05/Mar/2025 04:08PM
<b>Lab No</b>	<b>: 10137272</b>	Sample Collected ON	: 05/Mar/2025 04:08PM
Referred By	: Dr.GUFRAN RASHID	Sample Received ON	:
Refer Lab/Hosp	: CHARAK NA	Report Generated ON	: 05/Mar/2025 05:30PM

**CECT STUDY OF UPPER ABDOMEN**

- **Liver** is enlarged in size measures 165 mm and shows few (atleast 3) hypo-attenuating non-enhancing lesions in both lobes with the largest measuring approx. 44 x 31 x 33 mm seen in segments VIII / IVa. No intrahepatic biliary radicle dilatation is seen. Hepatic veins and IVC are seen normally.
- **Gall bladder** is partially distended and shows few intraluminal hyperdense calculi. No obvious mass lesion is seen in Gall bladder fossa. (CT is not modality of choice for biliary and gall bladder calculi, USG is advised for the same).
- **CBD** is normal at porta. No obstructive lesion is seen.
- **Portal vein** Portal vein is normal at porta.
- **Pancreas** is normal in size and shows homogenous density of parenchyma. PD is not dilated. No parenchymal calcification is seen. No peripancreatic collection is seen.
- **Spleen** is enlarged in size measures 157 mm and shows homogenous density of parenchyma. No SOL is seen.
- **Both Kidneys** are normal in size and position. No hydronephrosis is seen. No calculus is seen. Few small bosniak type I cortical cysts are seen in bilateral kidneys with the largest measuring approx. 7 x 7 mm seen at upper pole of left kidney.
- Few subcentimetric retroperitoneal & mesenteric lymphnodes are seen.
- No ascites is seen.

**IMPRESSION:**

- HEPATO-SPLENOMEGALY WITH HYPO-ATTENUATING NON-ENHANCING HEPATIC LESIONS AS DESCRIBED - LIKELY BENIGN [? SIMPLE HEPATIC CYSTS / ?? HYDATID CYST (LESS LIKELY)].
- CHOLELITHIASIS.
- BILATERAL SMALL BOSNIAK TYPE I RENAL CORTICAL CYSTS.

Clinical correlation is necessary.

(DR. JAYENDRA KUMAR, MD)
