ULTRASOUND STUDY OF WHOLE ABDOMEN

- **Liver** is normal in size and shows homogenous echotexture of liver parenchyma. No intrahepatic biliary radicle dilatation is seen. No space occupying lesion is seen. Hepatic veins and IVC are seen normally.
- **Gall bladder** is normal in size and shows anechoic lumen. No calculus / mass lesion is seen. GB walls are not thickened.
- **CBD** is normal at porta. No obstructive lesion is seen.
- **Portal vein** Portal vein is normal at porta.
- **Pancreas** is normal in size and shows homogenous echotexture of parenchyma. PD is not dilated. No parenchymal calcification is seen. No peripancreatic collection is seen.
- **Spleen** is normal in size and shows homogenous echotexture of parenchyma. No SOL is seen.
- No retroperitoneal adenopathy is seen.
- No ascites is seen.
- **Both kidneys** are normal in size and position. Mild hydronephrosis is seen on right side. Tiny bilateral simple renal cortical cysts are seen, (measures ~ 20 x 20 mm in mid pole of right kidney & measures ~ 6.2 x 4.8 mm in mid pole of left kidney). Right PUJ calculus measures ~ 9.9 mm is seen. Cortico-medullary differentiation is well maintained. Parenchymal thickness is normal. No scarring is seen. Right kidney measures 89 x 37 mm in size. Left kidney measures 93 x 45 mm in size.
- **Ureters** Both ureters are not dilated. UVJ are seen normally.
- **Urinary bladder** is partially distended with anechoic lumen. No calculus or mass lesion is seen. UB walls are not thickened.
- Bilateral seminal vesicles are seen normally.
- **Prostate** is normal in size, measures 34 x 31 x 30 mm with weight of 17gms and shows homogenous echotexture of parenchyma. No mass lesion is seen.

OPINION:

- **Tiny bilateral simple renal cortical cysts.**
- **Right PUJ calculus with mild hydronephrosis.**

Clinical correlation is necessary.
