CT WHOLE ABDOMEN

CECT STUDY OF WHOLE ABDOMEN

- **Liver & gall bladder** Liver is grossly enlarged in size [span 215 mm], and shows large number of heterogeneously enhancing soft tissue space occupying lesions of various sizes in parenchyma, largest space occupying lesion measure 113 x 82 mm. Gall bladder is distended & shows a large exophytic heterogeneously enhancing space occupying lesion along fundus region. The lesion is infiltrating transverse colon. The space occupying lesion measures 101 x 75 x 83 mm in size. No intrahepatic biliary radicle dilatation is seen. Hepatic veins and IVC are effaced.
- **CBD** is normal at porta. No obstructive lesion is seen.
- **Portal vein** Portal vein is normal at porta.
- **Pancreas** is normal in size and shows homogenous density of parenchyma. PD is not dilated. No parenchymal calcification is seen. No peripancreatic collection is seen.
- **Spleen** is normal in size and shows homogenous density of parenchyma. No SOL is seen.
- **Both Kidneys** are normal in size and position. Moderate hydronephrosis is seen on right side. Multiple calyceal & renal pelvic calculi are seen in right kidney, measuring 35 mm (stag horn) 8 mm, 11 mm & 7 mm. No mass lesion is seen.
- **Both** ureters are normal in course and calibre.
- Enlarged porto-caval, peripancreatic & retro-peritoneal nodes are seen, largest measuring 36 x 33mm.
- Minimal ascites is seen.
- **Urinary Bladder** is normal in contour with normal lumen. No calculus or mass lesion is seen. UB walls are not thickened.
- **Uterus** is normal in size and shows homogenous myometrial density. No endometrial collection is seen. No mass lesion is seen.
- **Cervix** is normal.
- No adnexal mass lesion is seen.
- Opacified bowel loops are seen normally. No abnormally thickened / edematous bowel loop is seen. No bowel origin mass lesion is seen.

IMPRESSION:

- **GROSS HEPATOMEGALY WITH MULTIPLE LIVER SPACE OCCUPYING LESIONS WITH LARGE EXOPHYTIC HETEROGENEOUSLY ENHANCING SPACE OCCUPYING LESION ALONG FUNDUS REGION OF GALL BLADDER WITH UPPER ABDOMINAL LYMPHADENOPATHY WITH MINIMAL ASCITES - METASTATIC CA GALL BLADDER.**
- **RIGHT RENAL CALCULI WITH MODERATE HYDRONEPHROSIS AS DESCRIBED.**

Clinical correlation is necessary.
