ULTRASOUND STUDY OF WHOLE ABDOMEN

- **Liver** is mildly enlarged in size measures 165 mm and shows homogenous echotexture of liver parenchyma. No intrahepatic biliary radicle dilatation is seen. No space occupying lesion is seen. Hepatic veins and IVC are seen normally.
- **Gall bladder** is normal in size and shows anechoic lumen. No calculus / mass lesion is seen. GB walls are not thickened.
- **CBD** is normal at porta. No obstructive lesion is seen.
- **Portal vein** Portal vein is normal at porta.
- **Pancreas** is normal in size and shows homogenous echotexture of parenchyma. PD is not dilated. No parenchymal calcification is seen. No peripancreatic collection is seen.
- **Spleen** is normal in size and shows homogenous echotexture of parenchyma. No SOL is seen.
- No retroperitoneal adenopathy is seen.
- No ascites is seen.
- **Right kidney** is normal in size and position. No hydronephrosis is seen. **Few small calculi are seen in upper calyx, measuring approx. 2-3 mm.** No mass lesion is seen. Cortico-medullary differentiation is well maintained. Parenchymal thickness is normal. No scarring is seen. Right kidney measures 101 x 50 mm in size.
- **Left kidney** is normal in size and position. **Minimal hydronephrosis is seen. Multiple small calculi are seen in upper, middle and lower calyces, largest measuring approx. 5 mm in upper calyx and 4 mm in middle calyx.** No mass lesion is seen. Cortico-medullary differentiation is well maintained. Parenchymal thickness is normal. No scarring is seen. Left kidney measures 90 x 42 mm in size.
- **Ureters** Left proximal ureter is dilated. Mid & distal ureter is obscured by bowel gases. Right ureter is not dilated. UVJ are seen normally.
- **Urinary bladder** is normal in contour with anechoic lumen. No calculus or mass lesion is seen. UB walls are not thickened.
- **Uterus** is bulky in size, measures 103 x 44 mm and shows homogenous myometrial echotexture. Endometrial thickness measures 8 mm. No endometrial collection is seen. No mass lesion is seen.
- **Cervix** is normal.
- Right ovary is normal in size and echotexture.
- **A large heteroechoic predominantly hypoechoic lesion measuring approx. 46 x 72 x 61 mm vol. 107 cc is noted in left adnexa with dense internal echoes. Left ovary is not visualized separately.**
- No free fluid is seen in Cul-de-Sac.

OPINION:

- **MILD HEPATOMEGALY.**
- **BILATERAL SMALL RENAL CALCULI.**
- **MINIMAL LEFT HYDROURETERONEPHROSIS.**
- **BULKY UTERUS.**
- **COMPLEX LEFT ADNEXAL MASS (ADV : TVS AND MRI PELVIS FOR FURTHER EVALUATION).**

Clinical correlation is necessary.

**DR. NISMA WAHEED
MD, RADIODIAGNOSIS**
