ULTRASOUND STUDY OF WHOLE ABDOMEN

Compromised scan due to excessive gaseous abdomen and patient fatty body habitus

- **Liver** is moderately enlarged in size, and shows homogenously increased echotexture of liver parenchyma. No intrahepatic biliary radicle dilatation is seen. No space occupying lesion is seen. Hepatic veins and IVC are seen normally.
- **Gall bladder** is normal in size and shows anechoic lumen. No calculus / mass lesion is seen. GB walls are not thickened.
- **CBD** is normal at porta. No obstructive lesion is seen.
- **Portal vein** Portal vein is normal at porta.
- **Pancreas** is normal in size and shows homogenous echotexture of parenchyma. PD is not dilated. No parenchymal calcification is seen. No peripancreatic collection is seen.
- **Spleen** is normal in size and shows homogenous echotexture of parenchyma. No SOL is seen.
- No retroperitoneal adenopathy is seen.
- No ascites is seen.
- **Both kidneys** are normal in size and position. Slightly raised bilateral renal parenchymal echogenicity. Relatively mild cortical thinning of right kidney. No hydronephrosis is seen. No calculus or mass lesion is seen. Cortico-medullary differentiation is maintained. Parenchymal thickness is normal. No scarring is seen. Right kidney measures 90x 46 mm in size. Left kidney measures 100x 53 mm in size.
- **Ureters** Both ureters are not dilated. UVJ are seen normally.
- **Urinary bladder** is normal in contour with anechoic lumen. No calculus or mass lesion is seen. UB walls are not thickened.
- Bilateral seminal vesicles are seen normally.
- **Prostate** is enlarged in size measures 37 x 40 x 34 mm with weight of 27 gms and shows homogenous echotexture of parenchyma. No mass lesion is seen.
 - Post void residual urine volume is nil.

OPINION:

- MODERATE HEPATOMEGALY WITH FATTY INFILTRATION LIVER GRADE II .
- RELATIVELY MILD CORTICAL THINNING OF RIGHT KIDNEY WITH SLIGHTLY RAISED BILATERAL RENAL CORTICAL ECHOGENICITY WITH MAINTAINED CORTICO-MEDULLARY DIFFERENTIATION ...SUGGESTIVE OF EARLY MEDICAL RENAL DISEASE.
- PROSTATOMEGALY GRADE I.

Clinical correlation is necessary.

[DR. R.K SINGH , MD]
