CT WHOLE ABDOMEN

CECT STUDY OF WHOLE ABDOMEN

CT study performed before and after injecting (intravenous) 60ml of non ionic contrast media and oral administration of 20ml contrast media diluted with water.

- **Liver** is enlarged in size (~160mm) and shows reduced density of parenchyma. No intrahepatic biliary radicle dilatation is seen. No space occupying lesion is seen. Hepatic veins and IVC are seen normally.
- **Gall bladder** is normal in size and shows normal lumen. No mass lesion is seen. GB walls are not thickened. (CT is not modality of choice for biliary and gall bladder calculi, USG is advised for the same).
- **CBD** is normal at porta. No obstructive lesion is seen.
- **Portal vein** Portal vein is normal at porta.
- **Pancreas** Pancreatic parenchyma is only visualized in head region and shows altered density. Body & tail of pancreas are not visualized. PD is not dilated. No parenchymal calcification is seen.
- Small hypodense cystic space occupying lesion / pocket of collection is seen in retrogastric region, measuring 27 x 18mm.
- Small hypodense cystic space occupying lesion / pocket of collection is seen in retrogastric region, measuring 27 x 18mm.
- **Spleen** is normal in size and shows homogenous density of parenchyma. No SOL is seen.
- **Both Kidneys** are normal in size and position. No hydronephrosis is seen. No calculus or mass lesion is seen.
- **Both Ureters** are normal in course and caliber.
- No retroperitoneal adenopathy is seen.
- No ascites is seen.
- **Urinary Bladder** is normal in contour with normal lumen. No calculus or mass lesion is seen. UB walls are not thickened
- Bilateral seminal vesicles appear normal.
- **Prostate** Shows normal density of parenchyma. No mass lesion is seen.
- Opacified bowel loops are seen normally. No abnormally thickened/edematous bowel loop is seen. No collection is seen. No bowel origin mass lesion is seen. I.C junction is normal.

OPINION:

- **MILD HEPATOMEGALY WITH FATTY INFILTRATION OF LIVER.**
- **DORSAL PANCREATIC AGENESIS WITH ALTERED DENSITY OF PARENCHYMA IN PANCREATIC HEAD (ADV: SERUM AMYLASE / LIPASE CORRELATION).**
- **SMALL HYPODENSE CYSTIC SPACE OCCUPYING LESION / POCKET OF COLLECTION IN RETROGASTRIC REGION - ? NATURE.**

Clinical correlation is necessary.
