ULTRASOUND STUDY OF WHOLE ABDOMEN

Excessive gaseous abdomen

- **Liver** is mildly enlarged in size (~162mm) and shows increased echotexture of liver parenchyma. No intrahepatic biliary radicle dilatation is seen. No space occupying lesion is seen. Hepatic veins and IVC are seen normally.
- **Gall bladder** is normal in size and shows anechoic lumen. No calculus / mass lesion is seen. GB walls are not thickened.
- **CBD** is normal at porta. No obstructive lesion is seen.
- **Portal vein** Portal vein is normal at porta.
- **Pancreas** is normal in size and shows homogenous echotexture of parenchyma. PD is not dilated. No parenchymal calcification is seen. No peripancreatic collection is seen.
- **Spleen** is normal in size and shows homogenous echotexture of parenchyma. No SOL is seen.
- No retroperitoneal adenopathy is seen.
- No ascites is seen.
- **Both kidneys** are normal in size and position. No hydronephrosis is seen. Bilateral renal parenchymal echogenicity is raised with attenuated cortico-medullary differentiation. A exophytic simple cortical cyst is seen at lower pole of left kidney measuring 47 x 45mm. Another tiny simple cortical cyst is seen at mid pole of right kidney measuring approx 6.0 x 5.6mm. No calculus is seen. No scarring is seen. Right kidney measures 85 x 39 mm in size. Left kidney measures 85 x 41 mm in size.
- **Ureters** Both ureters are not dilated. UVJ are seen normally.
- **Urinary bladder** is partially distended with anechoic lumen. No calculus or mass lesion is seen. UB walls are not thickened.
- Bilateral seminal vesicles are seen normally.
- **Prostate** is borderline enlarged in size measures 37 x 35 x 31 mm with weight of 21 gms and shows homogenous echotexture of parenchyma. No mass lesion is seen.

OPINION:

- MILD HEPATOMEGALY WITH FATTY INFILTRATION OF LIVER GRADE-I.
- BILATERAL RAISED RENAL PARENCHYMAL ECHOGENICITY WITH ATTENUATED CORTICO-MEDULLARY DIFFERENTIATION (ADV: RFT CORRELATION).
- BILATERAL SIMPLE RENAL CORTICAL CYSTS.
- BORDERLINE PROSTATOMEGALY.

(Possibility of acid peptic disease could not be ruled out).

Clinical correlation is necessary.

[DR. R. K. SINGH, MD]
