## **MRI: ABDOMEN**

### **IMAGING SEQUENCES (NCMR)**

**AXIAL: T1 & T2 Wis. CORONAL: T1 & T2 Wis. SAGITTAL: T2 Wis.**

**Uterus and cervix:** Moderate sized ill defined altered signal intensity lesion measuring [approx. 25 (vertical) x 21 (A.P) x 23mm (Trans)] is seen in cervix (predominantly anterior lip) with involvement of lower uterine segment. The lesion appears mild heterogeneously hyperintense on T2/TIRM, hypointense on T1 W images and shows mild restriction on DWI. Anteriorly fat plane of the lesion with posterior wall of urinary bladder is maintained. Posteriorly fat plane with rectum is maintained. No obvious parametrial infiltration is noted. The lesion is abutting endocervical canal, however no collection in uterine cavity. Uterus is post menopausal atrophic in size. Small intramural fibroid measuring approx. 17 x 15mm is seen in fundal region.

Both the ovaries are atrophic. No adnexal mass is seen.

Few subcentimeteric bilateral pelvic lymphnodes are seen, largest measuring approx. 14 x 7mm on right side.

**Liver** is normal in size and MR morphology. Margins are regular. No focal lesion is seen. No intrahepatic biliary radical dilatation noted. Portal and hepatic venous channels are within normal limits.

**Gall bladder** is not visualized – post cholecystectomy.

CBD is not dilated.

**Pancreas** is normal in size and MR morphology. Margins are regular. Pancreatic duct is not dilated. No focal lesion is observed.

**Spleen** is normal in size and MR morphology. No focal lesion is observed.

**Kidneys:** Both kidneys are normal in position and size. No hydronephrosis is noted. Visualized ureters are normal. Both adrenals are normal.

The stomach and other visualized bowel loops are grossly normal.

Urinary bladder is well distended.

No free fluid is seen in peritoneal cavity.

**IMPRESSION:**

- **Moderate sized ill defined altered signal intensity lesion in cervix with involvement of lower uterine segment as described - ? neoplastic (carcinoma cervix). Adv: contrast study & histopathological correlation.**

Please correlate clinically.
