<u>VIDHYA GYAN</u>						
Test Name	Result	Unit	Bio. Ref. Range	Method		
ECD	·		<u> </u>	<u> </u>		

Erythrocyte Sedimentation Rate ESR 8.00 3-13 Westergreen

Note:

- 1. Test conducted on EDTA whole blood at 37°C.
- 2. ESR readings are auto- corrected with respect to Hematocrit (PCV) values.
- 3. It indicates presence and intensity of an inflammatory process. It is a prognostic test and used to monitor the course or response to treatment of diseases like tuberculosis, acute rheumatic fever. It is also increased in multiple myeloma, hypothyroidism.

HBA1C						
Glycosylated Hemoglobin	(HbA1c)	5.0	%	4 -	5.7	HPLC (EDTA)

NOTE:-

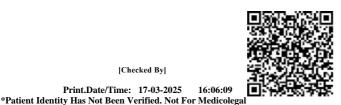

Glycosylated Hemoglobin Test (HbA1c)is performed in this laboratoryby the Gold Standard Reference method,ie:HPLC Technology(High performance Liquid Chromatography D10) from Bio-Rad Laboratories.USA.

EXPECTED (RESULT) RANGE:

Bio system	Degree of normal	
4.0 - 5.7 %	Normal Value (OR) Non Diabetic	
5.8 - 6.4 %	Pre Diabetic Stage	
> 6.5 %	Diabetic (or) Diabetic stage	
6.5 - 7.0 %	Well Controlled Diabet	ANAN
7.1 - 8.0 %	Unsatisfactory Control	
> 8.0 %	Poor Control and needs treatment

		<u>VID</u>	HYA GYAN		
	Test Name	Result	Unit	Bio. Ref. Range	Method
IRON			<u>.</u>		
IRON		104.00	ug/ dl	59 - 148	Ferrozine-no deproteinization

Interpretation:

Disease	Iron	TIBC	UIBC	%Transferrin Saturation	Ferritin
		A COLOR			
Iron Deficiency	Low	High	High	Low	Low
Hemochromatosis	High	Low	Low	High	High
Chronic Illness	Low	Low	Low/Normal	Low	Normal/High
Hemolytic Anemia	High	Normal/Low	Low/Normal	High	High
Sideroblastic Anemia	Normal/High	Normal/Low	Low/Normal	H igh	High
Iron Poisoning	High	Normal	Low	High	Normal

TIBC				
TIBC	284	.00 ug/ml	265 - 497	calculated
TRANSFERRIN SATURATION				
TRANSFERRIN SATURATION	36.6	52 %	22 - 45	Immunoturbidimetry

INTERPRETATION:

- Low Values in iron deficiency
- High Values in iron overload
- Raised transferrin saturation is an early indicator of Iron accumulation in Genetic Haemochromatosis.

FERRITIN				
FERRITIN	135	ng/mL	7 - 140	CLIA

INTERPRETATION:

Ferritin is a high-molecular weight iron containing protein that functions in the body as an iron Storage compound. Ferritin provides a more sensitive, specific and reliable measurement for determining iron deficiency at an early stage. The combined use of serum ferritin levels and mean corpuscular volume (MCV) has made differentiation between iron deficiency, beta-thalassemia trait and normal subjects possible at a very high level of accuracy. Serum ferritin measurements provide important clinical parameters for assessing the response to treatment with deferoxamine, in the treatment of thalassemia. Elevated levels are seen in malignant diseases such as leukemia, Hodgkins disease, breast cancer, head and neck cancer and ovarian cancer

LIMITATIONS:

Specimens from patients who have received preparations of mouse monoclonal antibodies for diagnosis or therapy may show either false positive or depressed values.

For diagnostic purposes the ferritin result should be used in conjunction with other data, e.g.: symptoms, results of other tests, clinical impressions, etc

ALK PHOS				
ALK PHOS	181.00	U/L	129 - 417	PNPP, AMP Buffer

INTERPRETATION:

- Alkaline phosphatase is an enzyme found in your bloodstream. ALP helps break down proteins in the body and exists in different forms, depending on where it originates. Liver is one of the main sources of ALP, but some is also made in bones, intestines, pancreas, and kidneys. In pregnant women, ALP is made in the placenta.
- Higher than normal levels of ALP in blood may indicate a problem with liver or gallbladder. This could include hepatitis (liver inflammation), cirrhosis (liver scarring), liver cancer, gallstones, or a blockage in bile ducts. High levels may also indicate an issue related to the bones such as rickets, Paget's disease, bone cancer, or an overactive parathyroid gland. In rare cases, high ALP levels can indicate heart failure, kidney cancer, other cancer, mononucleosis, or bacterial infection. Having lower than normal ALP levels in blood is rare, but can indicate malnutrition, which could be caused by celiac disease or a deficiency in certain vitamins and minerals.
