IISPL stands committed to building mutually beneficial partnerships with its customers, clients and stakeholders for a sustainable future that brings constant profits and value

1.2. Vision and Mission Statement

VISION

"Developing and delivering innovative solutions by transforming creative ideas into next generation cutting –edge technologies through consistent R&D and well plan implementation based on state-of-art technologies to organize service sector in INDIA."

MISSION

"Mission of ITDOSE is to stay at the frontier of technology, identify the changes and potential in the fast growing Indian market and to serve it with innovative solutions. We believe in thinking fast and ahead and to be prepared in advance for the solutions so that they can be delivered at the time of need".

1.3. Key Strength of the Company

- Ability to work with customer in a team partnership environment
- Track record of executing fast projects supported by clear understanding of client needs.
- A core team of highly-skilled resources containing more than 40 people.
- Ability to execute multiple projects.
- Energetic and experience team with process and technical expertise.
- Ability to work in partnership with other companies to provide an integrated solution to market.

1.4. Why Outsource?

In today's highly networked world, it has become increasingly simple to outsource your requirements. Outsourcing differs from contracting in that outsourcing involves the restructuring of an organization, allowing it to focus on what it does best. Simply put, outsourcing is to contract to specialists a company's non-core, non-revenue producing activities.

IT/Software Outsourcing, Business Process Outsourcing (BPO), Call Center Outsourcing, Consultancy Outsourcing, etc. have all become commonplace. With the advancement of technology and globalization today, the main question is "whom do I outsource to?" in place of "whether to outsource or not". Now to find a reliable partner becomes an absolute necessity

1.5. Why ITDOSE?

To start a business everyone needs a partner who one can rely in current and future situations. With ITDOSE you benefit from a technological expertise, Global exposure, highly well-defined process and proven information and project management, with a team of experts who'll get to grips with the issues your business faces

Product Overview

2.2. Hospedia

A Web Based Hospital Information Management System

Hospedia™

ITDOSE Hospedia is a complete web base ERP for Hospitals. **ITDOSE Hospedia** has been developed with the objective of streamlining the treatment flow of a patient in the hospital, while allowing doctors and other staff to perform to their peak ability, in an optimized and efficient manner. **Hospedia** developed by **ITDOSE** is modular, thus ensuring sustained benefits through changes in technology, protecting and providing optimal returns from the investment. It is modeled on a unique combination of a 'patient centric and medical staff centric' paradigm, beneficial to the recipients and the providers of healthcare. **Hospedia** uses a network of computers to gather, process, and retrieve patient care and administrative information for all hospital activities to satisfy the functional requirement of the users. It also helps as a decision support system for the hospital authorities for developing comprehensive health care policies.

ITDOSE Hospedia incorporates an integrated computerized clinical as well as financial information system for improved hospital administration and patient healthcare. It also provides and accurate and electronically stored medical records of the patient. A data warehouse of such records can be utilized for statistical requirements and for research. Hospedia is an exemplar of a centralized information system designed for quick delivery of operational and statistical information. The software is built around a highly optimized library. Application modules are layered around this core and can be suitably customized for any user specific requirements.

- Comprehensive User Security
- Affordable for small, medium & big practices.
- Cloud computing options
- Streamlined operations, enhanced administration and control
- Maximize resource utilization
- Seamless workflow management
- Rapid deployment and quick RO

- Auto Generated SMS
- Web Based HMIS Application
- Client Server Database Architecture
- Portable Across Various Platforms
- User friendly System Administration
- Supports HL7, HIPPA & Di-Com Standards
- Compatible with Mobile Devices
- Web Reporting
- Online MIS Dashboard
- Interfacing with Barcode, Lab Equipment

2.3. Innopath

Today's laboratories are privileged to be able to take advantage of the latest **LIMS** (Laboratory Information Management Solution) to operate with the highest level of efficiency, effectiveness, and quality. The real challenge is to find the right solution that meets both your immediate requirements and future needs. As your business grows, your operation must be continually supported without having to "build in" your new process needs, by painfully applying ad hoc systems or hiring costly external consultants who may not fully understand your business, operation, and legacy systems.

itDose

Innopath ™

*A solution hat optimizes Productivity,
Reduces Cost & Improves Quality*

A dominant provider of laboratory informatics, **ITDOSE Innopath** has successfully developed and delivered LIMS solution worldwide. Our informatics solutions are tailored to manage your organization's critical information across multiple laboratory facilities in order to optimize productivity and share knowledge more effectively. We deliver configurable-off-the-shelf solutions for a variety of functional laboratories focused on research, development, quality management, bio-banking and environmental monitoring - just to name a few.

ITDOSE Innopath continues to redefine enterprise laboratory informatics with its leading combination of functionality, flexibility, and technology in one platform. We help organizations model their business-specific workflows, seamlessly integrate with instruments and business applications and meet government regulations to increase productivity, reduce operating costs, and improve overall quality. With **Innopath**, your enterprise-wide information management is accomplished with

- Intuitive data entry from any Internet or Intranet access device and easy integration to 3rd party instruments and systems,
- Workflow and process automation through a simple user interface, and
- Compliance with internal standards and government regulations through programmable rules and electronic signature.

Meet Your Laboratory Informatics Requirements Today and Beyond

ITDOSE Innopath is committed to supporting your informatics needs both today and into the future. With flexible and easy-to-use configuration tools, our solutions can be quickly tailored to specific roles within the enterprise, adapted to changing business needs, and extended to other areas of the organization,

while also reducing ongoing validation costs. **ITDOSE Innopath** is an innovative and advanced web based LIS / RIS which provides the cutting edge on stop IT solution to the Diagnostic and Pathology lab chains. **ITDOSE Innopath** is can combine all the branches and collection centers and partner networks into a centralized platform to facilitate smooth functioning of the operations.

Because we believe that Good Service is a Good Business…
